

## The Periodic Smoke Inspection “Fleet” Program (PSIP)

- Established to promote self-inspection of fleet vehicles.
- Requires California-based truck and bus fleets with two or more heavy duty diesel vehicles (gross vehicle rating over 14,000 pounds; except for 1998 and older, the rating is over 6,000 pounds) to conduct annual smoke opacity and tampering self-inspections for all of their vehicles.
- To ensure compliance, the Air Resources Board audits maintenance and inspection records and may test a representative sample of vehicles.
